Projects

Crypto Trading Platform *React.js, Spring Boot, MySQL, WebSocket, AI, Docker* Jan 2025 – Apr 2025

- Architected a full-stack cryptocurrency platform tracking 20+ trading pairs with an AI-driven chatbot for market insights.
- Built WebSocket-based streaming APIs delivering real-time prices to 500+ concurrent connections, secured with JWT-based authentication for 100% safe wallet transfers.
- Containerised the platform with Docker and optimised MySQL queries via advanced indexing, cutting query latency by 60%.

Web Developer | Dr. Gunja Gupta Clinic *HTML5, CSS3, JavaScript, SEO* Freelance

- Developed a modern, responsive clinic website using HTML, CSS, and JavaScript with a focus on UI/UX and mobile accessibility.
- Implemented complex CSS animations, custom styling, and an interactive mobile navigation system without relying on heavy frameworks.
- Integrated Technical SEO (JSON-LD schema, Open Graph) and performance tracking tools (Google Analytics, Microsoft Clarity) to boost local search visibility and user engagement.

AI Number & Alphabet Detection *Python, Machine Learning, CNN, OpenCV* Jan 2024 – Apr 2024

- Developed a CNN-based recognition system achieving 96% classification accuracy on handwritten numbers and alphabets, integrating OpenCV for preprocessing.
- Optimised the image processing pipeline for real-time text extraction, reducing latency to under 200ms per frame.
- Processed and analysed 10,000+ test samples for handwritten character recognition, ensuring robust model training and validation.

Portfolio Website *HTML5, CSS3, JavaScript, Performance Optimization* Jan 2023 – Mar 2023

- Designed and deployed a portfolio site responsive across mobile, tablet, and desktop breakpoints, achieving a 95+ Lighthouse performance score.
- Reduced page load time from 4.2s to 1.1s (74% faster) via lazy-loading techniques and minimised JavaScript overhead.
